

Dynacare is looking for a Medical Laboratory Technologist to join our Chemistry team in Brampton, Ontario. This position is a one-year contract position working from 4 pm - 12 am, with some shifts scheduled on weekends.

**Responsibilities:**

- Ensuring sample identification is correct and specimen requirements are met according to established procedures
- Ensuring quality control standards are maintained, investigating missing samples and performing routine maintenance on laboratory equipment
- Recording, interpreting and/or approving test results
- Maintaining accuracy of appropriate documents
- Troubleshooting of clinical assays and equipment

**Must have:**

- CMLTO Registration as a practicing Medical Laboratory Technologist in good standing
- Demonstrated proficiency with Word, Excel and Outlook at an intermediate level.
- Solid ability to troubleshoot technical issues and provide recommendations for resolution

**Nice to have:**

- A demonstrated ability to work independently, apply sound decision making principles and self-manage in fast-paced environment
- Demonstrated high level of interpersonal skills required to succeed in a collaborative working environment

**DNA of an Ideal Dynacare Employee**

I make a difference in people's lives. I am a caring, collaborative team player who is passionate about quality and continuous improvement.

- Caring - I demonstrate strong empathy and genuine concern for my colleagues, patients and customers
- Collaborative Team Player - I know I play a key role in helping the Dynacare team achieve success. I am comfortable in a changing environment, and I can easily manage multiple priorities.
- Passion for Quality and Continuous Improvement - I am always looking to learn and solve problems. I am detailed oriented, adaptable and find ways to make things better.
